

- Client is Allison. She and her partner are from Canada.
- Allison is sexually active with her partner Daniel.
- Daniel and Allison have been having sex for 14 months.
- Prior to meeting Allison, Daniel discovered he had syphilis.
- Daniel did not tell client Allison that he has syphilis, because he thought she would not agree to have sex with him if he did.
- Daniel and Allison continued having sexual intercourse.
- Allison has recently discovered that she contracted syphilis from Daniel.
- Allison would not have continued having sex with Daniel had she known he had syphilis.
